

Overview

- This is a Qualification test to start attempting the hits. You must correctly answer 3 of the 5 questions to pass.
- You will be shown a set of 10 images extracted by querying the Flickr API with ANPs. You have to judge the emotions expressed by these images and ANPs.
- In case some of the images do not relate to the ANP or are missing, mark the emotions based on the majority of the images.
- You must mark all the emotions for a particular set of images to receive the score for that question.

Definition

An adjective-noun pair (ANP) is a short phrase that has one adjective and one noun with the adjective describing various attributes of the noun. For example: abandoned factory, old books

Plutchik's wheel of emotions

Plutchik's wheel of emotions is an infograph that uses the color wheel to illustrate variations in human affect and the relationship among emotions.

Intensity of emotion and indicator color increases toward the center of the wheel and decreases outward. At the center, terror, for example, becomes fear and then apprehension; ecstasy becomes joy and then serenity. Secondary emotions are displayed as combinations of the primary ones.

Example

Given the following set of images related to the ANP 'big flower'

The relevant emotions invoked are

- Ecstasy
- Joy
- Serenity
- Admiration
- Amazement
